# CRANE ELECTRICAL ROOM FIRE PREVENTION SYSTEM

FIRE PREVENTION SYSTEM

## THE CHALLENGE

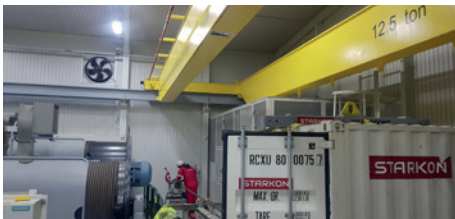

Installation and modification to an already existing Lingjack high-pressure fire suppression system. The space to install the additional equipment was limited, so it was decided to fabricate and install the system in situ.

## THE SOLUTION

STARKON supplied the specialized tools, equipment, method statement and workforce to perform the job.

## THE RESULT

A safe and according to standards working fire suppression system for the e-room of the container crane.
