STS CRANE WORKING PLATFORM

DEVELOP, DESIGN, FABRICATE AND DELIVERY OF A SPECIALLY MADE TROLLEY RAIL WORKING PLATFORM

STARKON
industrial services

THE CHALLENGE

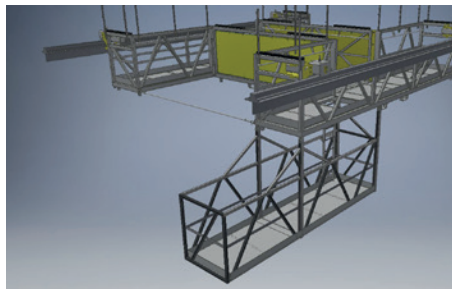

Maintenance on trolley rails of the ship-to-shore cranes is expensive and time-consuming. Access to the ship-to-shore cranes' trolley rails for maintenance purposes is mostly achieved by using scaffolding. As scaffolding is time-consuming, STARKON challenges itself to develop a solution for this problem.

THE SOLUTION

STARKON developed a working platform which results in a safer and faster work method to reach the trolley rail of the giant STS cranes.

THE RESULT

The working platform is available to RENT or for sale when required in combination with our trained STS crane rail team. For all repairs on STS trolley rails, such as short rail replacements, rail clip replacement etc., you can contact our STARKON team.
