

JACKING TIMBER

Jacking timber “stacking beams” of Azobé wood to support heavy structures. They are used to distribute the weight of a load over a given area on a certain height mostly used in construction and industrial jacking operations. Jacking timber is available for rental and sales.

Specifications

- 0.1 x.0.1 x 1 meter (standard)
- Custom heights and lengths are possible on request
- Weight (25LB) 12kg each

Certification

- Individual color marking
- Anti-slip surface
- Custom heights and lengths

STARKON QUALITY STANDARDS

Certifications

We provide an annual inspection of our rental fleet at least every three months and after each job. It includes inspection of wall thickness, and inspection for deformation, weld failure or other deviations. The scope of the inspection will depend on the type of product.

Inspections

All our products are provided with CE certification according to European Standards. If required, we can meet standards other than NEN standards, such as ISO or DNV approved standards.
