

# STEEL TRESTLES

Our steel trestle for mechanic's workshops are provided with flow declaration, certification and indelible relief flow indication. The reticular calibrated structure was the result of engineering research and calculations carried out by specialists in lifting and safety. It is a safe and reliable tool, suitable for production departments of industries, and artisans working under a security regime. Our Steel trestles are available for sale and hire.

STARKON's custom-designed steel trestles provide the ideal solution for any industrial or construction applications. Our trestle stands are available for supporting dies, moulds and many other materials. In addition to our standard models, we engineer and manufacture custom designed stands to meet your specific needs.

## Specifications

- 1.2 x 0.9 x 1 meter (standard)
- Custom heights and lengths are possible on request
- SWL 2000 kg standard
- DNV NEN certified

## Calculations

- All steel trestles are designed for a long lifetime, have a safety factor of 3 compared to the nominal workload.
- The standard working load limit is 2000 KG.
- We can supply trestles with a higher working load limit on request.

## STARKON QUALITY STANDARDS

### Certifications

We provide an annual inspection of our rental fleet at least every three months and after each job. It includes inspection of wall thickness, and inspection for deformation, weld failure or other deviations. The scope of the inspection will depend on the type of product.

### Inspections

All our products are provided with CE certification according to European Standards. If required, we can meet standards other than NEN standards, such as ISO or DNV approved standards.
