PROJECT SUPPORT

# REEL-LAY SYSTEM INSTALLATION

VESSEL SEVAN VEGA

## THE CHALLENGE

STARKON's client requested support from STARKON from the beginning of the project right until handover and within a given timeframe.

[Watch the movie](#) to see how the STARKON team fits in.

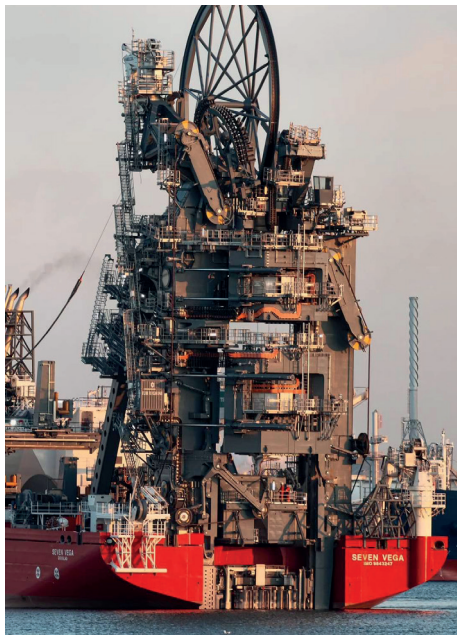

## THE SOLUTION

The Sevan Vega Reel-Lay system is a one-of-a-kind system and the most advanced in the field. As the system is a first build, we expected some challenges. STARKON delivered the required support on mechanical and electrical manpower, as well as the local supply of the required parts and tools.

## THE RESULT

Due to the support in the field as well as from STARKON's Stellendam-based office and workshop, the whole STARKON team managed to meet the client's high expectations.

We supplied parts, tools and manpower within the tight timeframe, and kept the standards of quality high. And we delivered yet another project without any incidents. SAFETY always.
