PROJECT SUPPORT

REPAIR WORKS ON SPUD POLES

FOR ONE OF THE WORLDS' LARGEST "CUTTER SUCTION DREDGER" (CSD)

THE CHALLENGE

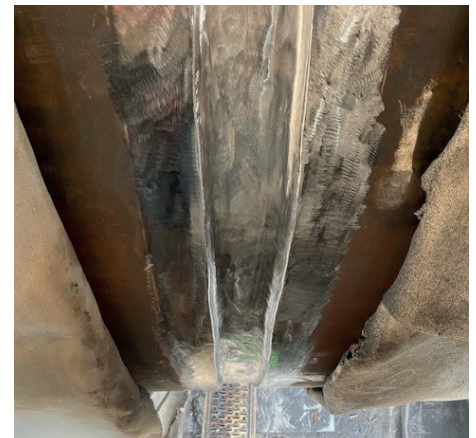

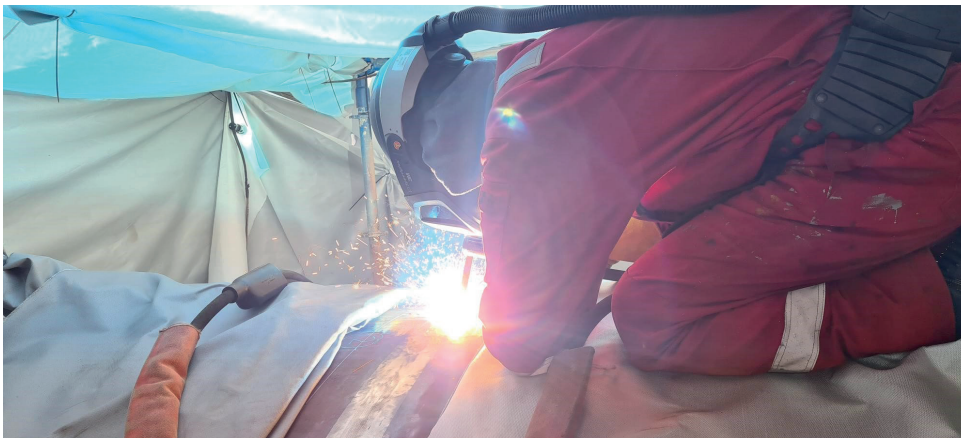

STARKON's client requested the removal and replacement of several constructal welded parts. The biggest challenge was to react fast and provide skilled teams of personnel within a short time for both day and evening shifts.

THE SOLUTION

STARKON provides national and international technical personnel for projects and has an extensive network and several technical teams. This means we have short and flexible delivery times. Due to this, STARKON was able to fulfil this request.

THE RESULT

STARKON managed to provide teams who started the project in good cooperation. There was clear communication between the customer and the teams, even when we were requested to switch over to another technical discipline and provide the (specially requested) tools consumables. STARKON executed the requested works to the customer's satisfaction.
