

RAIL CLIPS

STARKON's rail clips are designed for long life, and only high-quality standard raw material is used during production.

Specifications

- Upon request

Certification

- Material certificates

Certifications

- All STARKON supplied clips are designed for long life.

Calculations

- All supports have a safety factor of 2 compared to the nominal workload.
- The standard working load limit is 350 tons.
- We can supply stooing with an even higher working load limit on request.

STARKON QUALITY STANDARDS

Certifications

We provide an annual inspection of our rental fleet at least every three months and after each job. It includes inspection of wall thickness, and inspection for deformation, weld failure or other deviations. The scope of the inspection will depend on the type of product.

Inspections

All our products are provided with CE certification according to European Standards. If required, we can meet standards other than NEN standards, such as ISO or DNV approved standards.
