

RAIL SOLE PLATES

STARKON's rail sole plates are designed for long life, and only high-quality standard raw material is used during production. We can offer standard specifications AAS OEM requirements as well as improved sole plates. The function of sole plates is very important within systems of rail installation for overhead travelling cranes, harbour cranes or gantries.

Specifications

- Upon request

Certification

- Material certificates

Optional

- Long sole plates and single sole plates

Calculations

- All STARKON supplied sole plates are designed for long life.

STARKON QUALITY STANDARDS

Certifications

We provide an annual inspection of our rental fleet at least every three months and after each job. It includes inspection of wall thickness, and inspection for deformation, weld failure or other deviations. The scope of the inspection will depend on the type of product.

Inspections

All our products are provided with CE certification according to European Standards. If required, we can meet standards other than NEN standards, such as ISO or DNV approved standards.
