STEEL SUPPORT STRUCTURE

STRADDLE CARRIER GAS STATION SUPPORT STRUCTURE

THE CHALLENGE

To fuel up straddle carrier machines in the container ports, a 'simple' solution was requested.

THE SOLUTION

STARKON started with the in-house design and engineering, including the production of the solution in good cooperation with the client to meet the requirements.

THE RESULT

After the design and engineering were completed, STARKON produced and delivered a 'simple' platform that can be installed on top of any standard shipping container. The platform delivers safe and easy access to the straddle carriers to fuel them up in an efficient way.
